

# REPURPOSED

A NEW LIFE FOR RETIRED ASSETS

# Extending A Legacy

Every asset has a story—and its final chapter shouldn't end in a landfill. Tellerex transforms retired FI assets and other outdated technologies into purposeful, durable products like benches, bike racks, and furniture.

Repurposing isn't just an environmental decision; it's a strategic one. By prioritizing material reuse, businesses align with Environmental, Social, and Governance (ESG) goals, reduce waste, and mitigate compliance risks.

Additionally, thoughtful asset disposition safeguards brand integrity by ensuring that decommissioned equipment is handled responsibly and sustainably.

# The Evolution of Asset Management

## The Old Way: Linear and Wasteful

-  **Discard and Replace:** Assets were discarded at the end of their lifecycle, often sent to landfills with no thought of reuse.
-  **Environmental Neglect:** E-waste and components accumulated, contributing to pollution and depleting natural resources.
-  **Missed Value Opportunities:** Functional parts and valuable materials were wasted instead of reclaimed or repurposed.
-  **Liability Risks:** Improper disposal left sensitive data and environmental compliance concerns unresolved.
-  **Short-Term Focus:** Asset management was transactional, focusing solely on immediate needs rather than long-term impact.

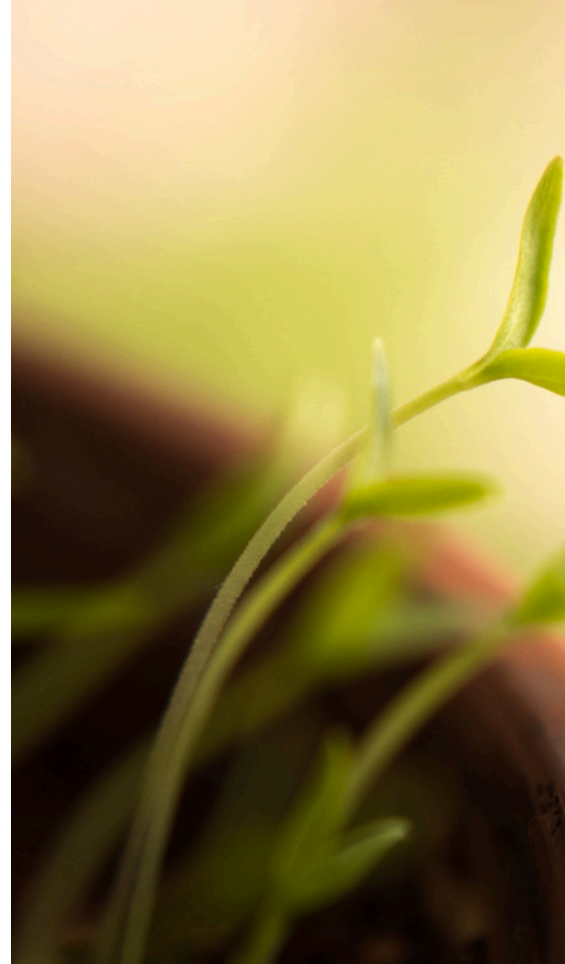

## The New Way: Circular and Sustainable

-  **Closed-Loop Lifecycle:** Assets are managed holistically, ensuring components are reused, repurposed, or responsibly recycled.
-  **Zero Landfill Commitment:** Materials are diverted from landfills, reducing environmental harm and promoting sustainability.
-  **Value Recovery:** Valuable components are extracted and transformed into new products, maximizing their potential.
-  **Risk Mitigation:** Secure processes ensure compliance with environmental standards and safeguard sensitive data.
-  **Future-Forward Thinking:** Asset strategies align with ESG goals, promoting innovation and responsibility in every stage.

# Renewing Asset Value

## Transforming Retired Assets into Renewed Value

When assets reach the end of their primary lifecycle, they don't have to reach the end of their value. Tellerex offers three sustainable solutions that extend the life and utility of retired assets while supporting Environmental, Social, and Governance (ESG) goals.

### REFURBISHING

Restoring  
Functionality and  
Value

### REMARKETING

Finding New  
Homes for  
Functional Assets

### REPURPOSING

Transforming  
Materials into New  
Innovations

## Crafted for Work, Home, and Beyond

Our design process embraces creativity and functionality, ensuring each piece not only reflects sustainability but also enhances the spaces where people live and work.

Whether it's a striking desk accessory for your office, a statement furniture piece for a home, or a custom design tailored to your needs, the result is always innovative, durable, and eco-conscious.

## REPURPOSED

*Contact us to discuss creating a custom repurposed piece tailored to your vision.*

### Single Bench Options

"The Fold" denotes the folded characteristic of the raw material, resulting in a visually seamless unit.

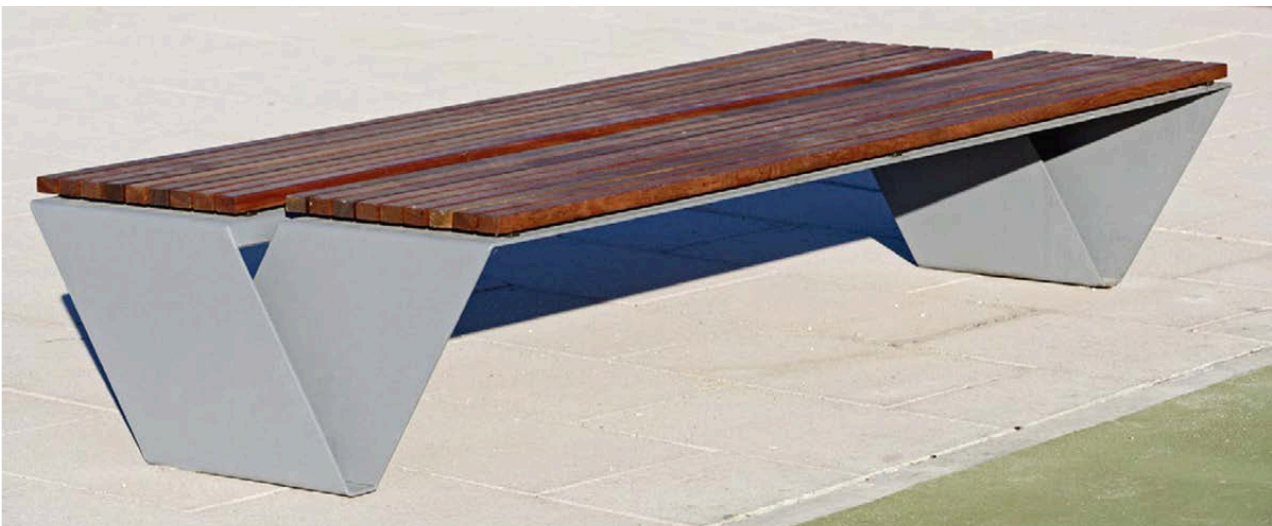

### Double Bench Options

Available in single, double, and double backless variations, each boasting a length of 6.6 feet.

## 'The Fold' Bench Collection

Elements of this collection features a continuous bent strip crafted from recycled metal, embodying sustainability and elegant design.
